DETAILED ACTION

Election/Restrictions

1. Claims 14-55, 60-76 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9. Claims 75 and 76 should have been included in-group III.
2. This application contains claims 14-55, 60-76 drawn to an invention nonelected with traverse in Paper No. 9. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2838

5. Claims 1-7, 56-59 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Carollo (USP 4,346,342). See figure 3, abstract and column 4, lines 14-68.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carollo (USP 4,346,342) in view of Goder (USP 6,127,814). Carollo discloses the claimed invention except for the use of synchronous rectifier in circuitry for limiting current. Goder discloses that it is known in the art to provide the use of synchronous rectifier in circuitry for limiting current. It would have been obvious to one having

ordinary skill in the art at the time of the invention was made to provide the use of synchronous rectifier in circuitry for limiting current of Goder with the current limiting voltage regulator of Carollo, in order to provide a method and circuit arrangement for sensing the output current in a switch mode power converter in order to provide protection that are responsive to overload or short circuit conditions.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art discloses the state of the art in the field of current limiting protective circuitry.
